

LUIS ADRIAN SALAZAR LOZANO

B.E. MECHANICAL ENGINEERING | AGUASCALIENTES INSTITUTE OF TECHNOLOGY

theadriansl@hotmail.com | +52 449 415 8248 | <https://www.linkedin.com/in/luisadriansalazar/>

Mechanical Engineer with 13 years of experience in the automotive industry, specializing in Quality Engineering. Proven expertise in delivering exceptional quality services to top-tier companies, including **LUCID Motors, Hyundai/KIA**, and conducting **vehicle testing for Mercedes-Benz and Volkswagen**. As a **Senior Supervisor at Nissan**, led **Quality Assurance** and **Quality Engineering** teams, successfully overseeing the launch of **52 new projects** and managing **New Models** and **Minor Changes**. Extensive experience in **regulation and homologation** for **98 countries**, as well as equipment and facility allocation and **Engineering Change Management**.

Notable achievement: Spearheaded the **Quality Campaign Cost Reduction Project**, saving **USD \$250,000** annually through the implementation of **Virtual Confirmation of BOM Specifications** prior to production trials.

PROFESSIONAL EXPERIENCE

Quality Resident Engineer /Automotive Liaison

Formel D

Dates: February 20th, 2025 – June 27th, 2025

Address: 3 Research Dr. Suite 110, Greenville, SC 29607, USA

Manager: Bogdan Ranete

Activities:

- Guarantee customer satisfaction by providing technical assistance, resolving quality concerns, and reinforcing the contracted client's reputation.
- Develop and maintain strong professional relationships with customers at the plant level.
- Earn customer trust through consistent delivery on commitments.
- Maintain clear and direct communication channels between the OEM and the contracted client.
- Recommend improvement opportunities to both the OEM and the contracted customer.
- Promptly investigate issues at the OEM's site to identify solutions, prevent claims, and notify production facilities to apply corrective measures. Share claim-related information proactively with the Plant for analysis and resolution.
- Conduct regular audits of how customers manage and use our products.
- Support prototypes, pre-series builds, line trials, product launches, and engineering changes as required by the customer.
- Contribute to customer requirements involving technical modifications and provide technical assistance when needed.
- Represent the contracted partner while safeguarding customer interests.
- Coordinate on-site repair or sorting activities, ensuring these actions are only carried out with prior written approval from the contracted client.

Quality Liaison

Martineia Rollstar

Dates: January 16th, 2022 – January 26th, 2025

Address: 6655 Northwest Dr, Mississauga, ON L4V 1L1, Canada

Manager: Danielle Reid

Activities:

- To represent Martineia Rollstar at the Customer professionally and with a clear understanding the products and requirements
- Participate in the initial inspection of physical parts upon arrival at the OEMs/Customers manufacturing facility (usually related to new or modified changes)
- Address any issues with non-conforming products - developing and executing plans related to corrective actions
- Provide project status to management and customers
- Manage assigned projects effectively (e.g. develop project plans, maintain issues list, follow-up on assigned tasks, facilitate calls, oversee small teams as needed)
- Work to support the Advanced Product Quality Planning (APQP)/Current Production cross-functional teams on the development of new and existing components to meet critical customer deadlines
- Reviewing designs (2D + 3D CAD and/or physical prints) and assisting in customer design reviews
- Support the PPAP Submissions with respect to the AAR submissions, signature, and approval within specified timeframe
- Review and make recommendations for the disposition of non-conforming/suspect products in a timely manner, receive Return Material Authorization (RMA) approvals from Martineia Rollstar and ensure proper disposition of material is carried out.

Quality Supervisor

Preferred Precision Group

Dates: October 13th, 2021 - October 18th, 2022

Address: 1310 Comer Ave, Pell City, AL 35125

Supervisor: Christopher Glymph

Activities:

- Coordinate and monitor the activities of a work group or cell
- Ensures completion of work and customer requirements while complying with all company quality and safety processes
- Responsible for the coordination of shift start-up activities as well as end of shift clean up or other activities
- Ensure appropriate tools and materials are available for completion of jobs
- Provide on the job training for any new work instructions when applicable
- Report any accidents or incidents that occur immediately to a supervisor
- Report any policy or procedure violations to Manager
- Participate, support, and comply with all health, safety, quality, ISO and 6S Initiatives, compliance and Lean initiatives, requirements, and/or training

Quality Control Engineer

Allswell for Hyundai MOBIS/ KIA

Dates: December 6th 2020 - October 13th 2021

Address: 124 Big Horn Drive. Newnan, GA. 858342

Supervisor: Roberto Velazquez

Activities:

- Manage overall quality control activities in plant
- Analyze engineering specifications and manufacturing processes to determine standards and establish quality and reliability objectives of finished product;
- Apply statistical methods and perform mathematical calculations to identify the cause of quality problems;
- Document quality problems and suggest solutions for quality issues;
- Assist product developers with detecting and resolving product defects;
- Coordinate quality control objectives and activities to resolve production problems, maximize product reliability, and minimize costs;
- Communicate with management to develop acceptable production and design standards;
- Direct and develop test plans and automated testing tools;
- Ensure compliance with the clients' product specifications and implement quality control objectives and activities;
- Analyze product data to identify causes of recurring quality problems; and
- Maintain ISO certification by ensuring our company's compliance with ISO policies.

Tester Engineer

IDIADA Applus for Mercedes Benz

Dates: January 14 2020 - December 1st 2020

Address: Lateral Autopista México, núm. 7534, Col. Ex Rancho Moratilla, 72110, Puebla, Mexico

Manager: Xavier Larroy

Activities:

- Manage testing and development activities as regards to Complete Vehicle Durability
- Ensure the correct execution of technical projects
- Organize and manage the tests samples (vehicle and test parts)
- Ensure that test activities (preparation, execution, and analysis) are performed in accordance with the test procedures, test books and Industry standards
- Participate, conduct, and support test activities performed in proving grounds, labs and/or on public roads, when necessary
- Collect and analyze the tests data, with specific software and analysis tools
- Generate technical report aligned with customers' expectations and internal quality standards
- Participate in project meetings with customers, suppliers and other relevant parties involved
- Provide interactive and manual support to mechanical and testing activities, including vehicle preparation and driving, when required
- Ensure general housekeeping of working (office and workshop) environment

Nissan Motor Corporation

Dates January 07, 2013 / October 16, 2019

Carretera Panamericana Sur Km 112, 20396 Ex-Hacienda de Peñuelas, Ags., Mexico, Aguascalientes (Aguascalientes).

Manager: Cesar Salas Campos

Quality Assurance Process Senior Supervisor

2017-2019

Activities:

- Field Administration of 82 people (5 direct) in a high paced production environment (65 JPH).
- In charge of QA Laboratory, Torque and Material Lot Audit areas
- Manage KPI Quality, Time, Cost, Safety and Environment.
- Process Audit and Feedback.
- Standard Operation Sheet evaluation and improvement.
- Team work evaluation, feedback and development.
- Kaizen, PDCA, JIT, 5s, TQM, QRQC.
- QA Meeting with other functions reporting every 2 hours of Issues detected at Assembly line, PDI, Tester Line, Shower Test and Driving Test and Audits.
- Task Force Team definition for Technical Quality Concerns.
- Factor Analysis and Verification.
- Definition of Immediate and follow up for definitive Countermeasures.
- Presentation of Shift Results and Countermeasures to Managers and Above at QRQC Meeting.
- QA Basic Skill and Methods Master Trainer.
- Global Implementation of Water Intrusion Thermal Analysis Method
- Global Implementation of Specification Confirmation Sheet vs BOM
- Confirmation of line feed and status of exclusive parts with suppliers
- Confirmation and monitor of sequenced parts and update of poka-yokes
- Confirmation of synchronized parts (modules) with suppliers for new projects.

Quality Engineering New Projects

2013-2015 New Model Senior Supervisor

2015-2017 Staff Facelift and Minor Change

Activities:

- Support training new personal on Quality Assurance, Quality Control and support developing QA Standards for 2 New Plants in Aguascalientes (Nissan 2 and COMPAS)
- Project leader for New Model launch on Quality Assurance function.
- Preventive Master Schedule: Define, Plan and Controls for vehicle tests on projects. From Virtual Confirmation, Production Trials, SOP and Delivery to Customer.
- Use of EPIC and Siemens NX system for consult and confirmation of Specifications.
- Participation Data traceability task force team (Control of Inventory for Lot number of Important Safety Parts in case of Recall)
- Preparation and Audit of Quality Assurance Standards (PDI, Tester Line, Water Intrusion, Legal, Driving Test, Laboratory, Torque and Audit)
- Report and Training for Skill Up on New Operations, Audits and Quality Evaluation.

- Job and Equipment definition and allocation for new inspection.
- Vehicle Specification Report (BOM Confirmation Judgment) along with Production Control and R&D.
- Preparation and Evaluation: Quality Static & Dynamic, Quality Vehicle Control Characteristics, Electronic Static Evaluation, Fire prevention, Vehicle Weight/Dimension and posture, Fog/Head Lamp aiming, Breaking Force, Regulation Check, Air Condition Gas measurement, Water Intrusion, Splash, Squeak and Rattles, Marketability, NVH, Customer Review, Battery Voltage, Infotainment, Durability, Customer Review.
- “Buy off” meeting of Units between shops and processes (Stamping, BiW, Paint, Plastics and Assembly).
- Preparation of units of New Model for Magazine lot, IQS, IIHS J.D. Power and Customer Report
- Assignments to Quality Concerns and Cross functional Team leader.
- Leader of Customer Satisfaction Team "Squeak and Rattles", “Wind Noise”, “Fit and Finish”
- Implementation of QAL, Equipment and Facilities and Engineering Skill
- Quality Control Trainer for New Engineers at plant.
- Milestones Report for managers and above.

COURSES AND CERTIFICATIONS

- V-Up (same as Six Sigma yellow belt).
- Harvard Management Mentor Business School.
- Premium Quality (IPES 4.5).
- English
 - TOEIC 790pts.
 - Versant 60/70 pts.
- Core Tools and APQP. 25081706 TÜV Rheinland.
- QC Story.
- Advance Excel (Macros, Pivot Charts, some visual Basic)
- Siemens NX, Solid Works and Autocad.
- SAP ERP (Basic knowledge), EPIC and G2B

General Automotive Knowledge:

- Fit and Finish, •Testing -ADAS Advanced Driver Assistance Systems: ICC, FEB, Parking, Auto Pilot, Sleep Alert, Active Parking Assistance, HUD, ABS, etc. •Water Intrusion •NVH •Durability •Squeak and Rattles
- Infotainment Systems •Brake Test •Wheel Alignment •Pull To One Side •Customer review (Driving, Functional, Comfort, Appearance interior and exterior) •Benchmark study.
